## Revision Summary

First Issue	Issue Date	Implementation Requirements	Approved By
1	10 Jul 07	Created by Renee Morphet – document established to provide framework for ESHMS and safety Dept of Planning Project Approval conditions.	S Alexander

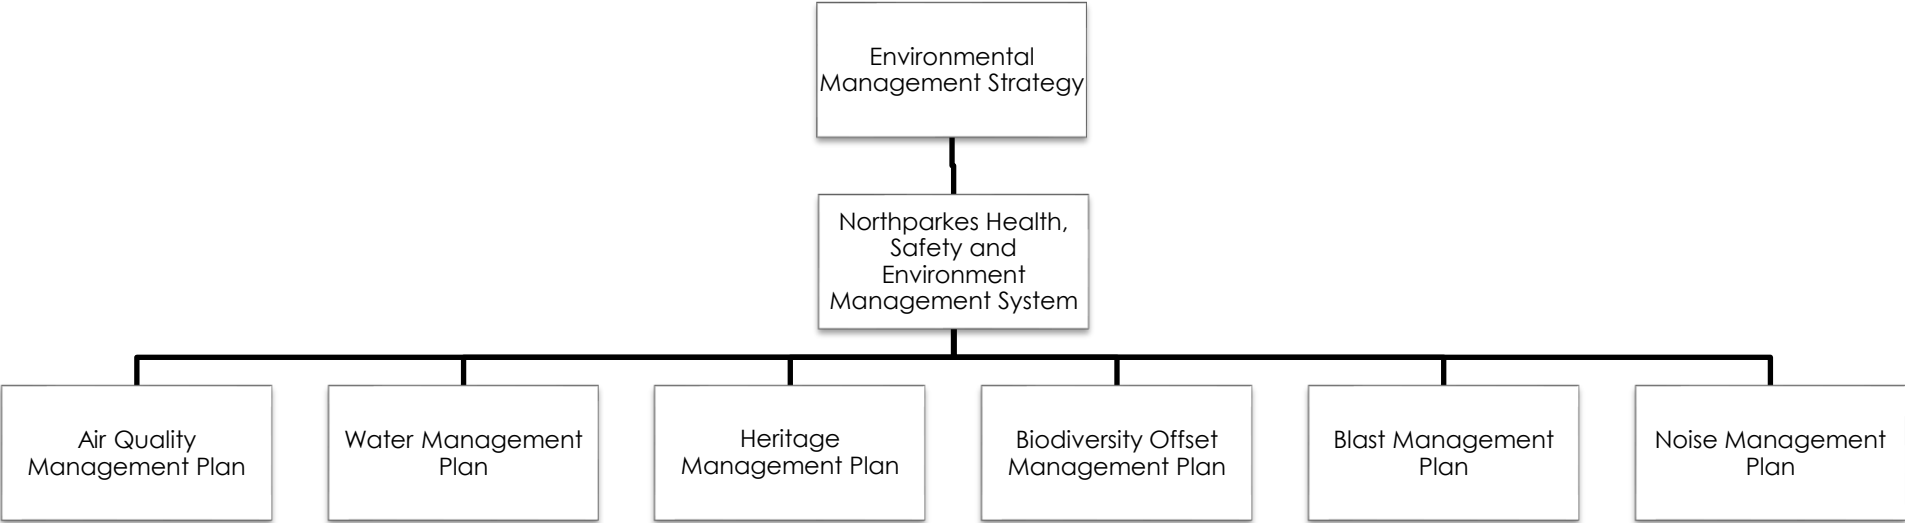

Version No.	Revision Date	Summary of Revision Details	Approved By
2	28 Aug 07	Updated by R Morphet to incorporate comments from Dept of Planning	S Alexander
3	13 Sep 07	Updated by R Morphet to incorporate additional comments from Dept of Planning	S Alexander
4	10 Nov 08	Updated by R Morphet – minor wording changes only, updated	S Alexander
5	12 Feb 10	Updated by R Morphet – minor wording changes only, updated	K Edwards
6	11 Feb 11	Updated by T. Warren – minor wording changes only updated	B Marstan
7	May 14	Review by Bharath Ramakrishnappa – changes made to comply with Project Approval 11_0060.	B Ram
8	May 15	Updated with minor changes_ MP	M Priest
9	Sep 16	Annual review process. Update in accordance with ISO14001 2015	M Priest
10	Oct 17	Annual review with no amendments	PSE Manager
11	Oct 18	Annual review with no amendments	PSE Manager
12	Nov 19	Annual review	C Dingle
13	Mar 20	Updated to new DCS	M Row
14	Jun 20	Annual review	C Higgins
15	Jun 21	Annual review following Independent Environmental Audit	C Higgins
15.1	Jul 21	IEA action - add revision dates to revision summary	C Higgins
15.2	Oct 21	Mandatroy Review following submission of IEA report	C Higgins
16.0	May 23	Updated following approval of MOD6, air quality monitoring program updated to remove TSP and depositional dust. Various retention ponds added for E31 precinct. Inclusion of vibration and overpressure monitoring	M Thomas
16.1	Dec 23	Mod10 Review	C Higgins
16.2	Mar 24	Update to Evolution	D Shaw

Consultation Required	Publically Available Locations

# 1. OVERVIEW

## 1.1 Background

Northparkes Mining Services Pty Limited (Northparkes) is the manager of the Northparkes Joint Venture, an unincorporated joint venture between Evolution Mining (Northparkes) Pty Ltd (80%); Sumitomo Metal Mining Oceania Pty Ltd (13.3%) and SC Mineral Resources (6.7%). Northparkes is a copper-gold operation in Goonumbla, situated 27 kilometres north-west of the town of Parkes.

Construction of the ore processing plant and associated facilities began in 1993. Open cut mining commenced on the E22 and E27 ore bodies in late 1993. Development of the E26 lift 1 block cave underground mine began in 1994, with full scale production commencing in 1997.

## 1.2 Mining Context

Operations at Northparkes primarily comprises underground mining from multiple ore sources that feed a processing plant approximately 7.8 million tonnes per annum (Mtpa). The underground mine is accessed via a decline ramp from the surface for people and materials with ore transported to the surface via inclined conveyors and a hoisting shaft, with a nominal capacity of 7.2 Mtpa. Northparkes utilises low cost block and sub-level cave mining and exploits industry leading technology, such as semi-autonomous loaders and various cave monitoring systems.

The ore processing operation consists of four stages: crushing, grinding, flotation and thickening / filtering. In addition to producing concentrate, the ore processing team also manages tailings disposal. The concentrator was constructed in two modules. Each module consists of its own grinding circuit with a single flotation circuit, concentrate thickener and filter. After extracting the copper and gold bearing minerals, the tailings are combined in a single tailings thickener before being deposited in the active tailings storage facility.

Northparkes' copper concentrate is transported to a rail siding where it is then transported by rail to port, for shipping to overseas customers.

## 1.3 Environmental Management

The Northparkes Mines (Northparkes) Environmental Management Strategy (EMS) has been prepared in accordance with the requirements of Development Consent (DC)11\_0060.

DC11\_0060 was granted under section 75J of the Environmental Planning and Assessment Act 1979 (EP&A Act) on 16 July 2014. In November 2023, Northparkes were issued with Modification 10 to DC11\_0060.

The EMS takes into consideration the commitments stated in the Environmental Assessment, Environmental Impact Statement, Statement of Environmental Effects, EPL conditions and Mining Lease Conditions. In addition, commitments outlined in Northparkes environmental policy are also taken into account.

This document outlines the Environmental Management Strategy for Northparkes including organisational responsibilities, planning activities, procedures, processes, implementation and review. It is an integral component of the overall environmental management system for Northparkes Mines.

The subordinate plans and policies have been developed in consultation with relevant government agencies and departments, and are updated as required.

Doc No. PLN-0062	Version No. 16.02	Next Review Date 14/03/2025	Owner Environment & Farms Superintendent
---------------------	----------------------	--------------------------------	--

Copies of the various strategies, plans and programs required under the conditions of DC11\_0060 have been included within this EMS as follows:

- PLN-0056 – Water Management Plan
  - PLN-0090 – Surface Water Management Plan
  - PLN-0091 – Groundwater Management Plan
- PLN-0036 – Air Quality Management Plan
- PLN-0070 – Noise Management Plan
- PLN-0052 – Blast Management Plan
- PLN-0074 – Heritage Management Plan
- PLN-0065 – Biodiversity Offset Management Plan
- PLN-0092 – Traffic Management Plan
- PLN-0060 – Rehabilitation Management Plan

## 2. SCOPE

This document applies to all activities undertaken by Northparkes including mining and exploration activities, processing of copper / gold ore resources, project development, maintenance activities, mine closure, logistics, associated service and support functions, bore fields, farming operations and products.

## 3. PURPOSE / OBJECTIVES

The purpose of the EMS is to:

- provide an overall framework for environmental management;
- identify key environmental aspects to be addressed in the strategy and supporting plans and procedures;
- establish procedures for reviewing progress and implementing corrective actions; and
- provide a framework for review and continual improvement.

The EMS establishes an environmental management framework for all mining and surface activities. It includes the development and management of environmental management plans, procedures and reporting requirements.

Management of environmental aspects and issues of the mine are documented, regulated, controlled and measured through this document (EMS), various environmental management plans, and the Annual Review. These plans conform to the requirements of the Department of Planning, Industry and Environment (DPE), and reflect the overall operational mining and rehabilitation strategy contained within the Northparkes Rehabilitation Management Plan.

An Annual Review is prepared each year and lodged with the DPE and relevant agencies. The Annual Review describes the overall management system for the operation and specifically reports on the progress made in implementing any specific initiatives noted in previous Annual Reviews or matters raised by the DPE. The Annual Review also sets out the program for the coming reporting period, results of environmental monitoring undertaken and assesses the environmental performance of the operation.

Doc No. PLN-0062	Version No. 16.02	Next Review Date 14/03/2025	Owner Environment & Farms Superintendent
---------------------	----------------------	--------------------------------	--

## 4. RESPONSIBILITIES

General role responsibilities are outlined in the Health, Safety and Environment Responsibilities and Accountabilities Procedure (PRO-0080). Personnel carrying out work under this document must be familiar with and comply with it in full. The following persons have specific responsibility:

**Table 1: Responsibilities**

Role	Responsibility
All Workers	<ul style="list-style-type: none"> <li>– conduct activities relating to Northparkes in compliance with this Strategy.</li> <li>– report any environmental hazards, risks or incidents as per this Strategy.</li> </ul>
Environmental Team	<ul style="list-style-type: none"> <li>– develop, implement and maintain environmental monitoring programs to comply with this Strategy.</li> <li>– complete reporting requirements as required by this Strategy.</li> <li>– maintain environmental monitoring data as per relevant environmental management plans.</li> </ul>
Environment and Farms Superintendent	<ul style="list-style-type: none"> <li>– complete external and internal reporting as required by this strategy</li> <li>– prepare budget proposals required to provide adequate resources for the implementation of this Strategy.</li> <li>– develop, implement and maintain the environmental components of the HSEMS.</li> <li>– coordinate training requirements associated with this Strategy.</li> <li>– liaise and report with government and other relevant stakeholders as required by this Strategy.</li> <li>– complete obligations, planning and auditing requirements as required by this Strategy.</li> </ul>
PSE Manager	<ul style="list-style-type: none"> <li>– coordinate the development and implementation of environmental management process to comply with this strategy.</li> <li>– complete statutory notifications as required by this Strategy</li> </ul>
Managing Director	<ul style="list-style-type: none"> <li>– must provide sufficient resources to comply with this document</li> </ul>

## 5. ENVIRONMENTAL MANAGEMENT FRAMEWORK

Implementation of the Strategy assists in minimising the environmental impacts of mining related activities by facilitating continual improvement in environmental performance.

The Strategy outlines the minimum standard to ensure Northparkes manages these aspects and impacts in a manner that is planned, controlled, monitored, recorded and audited, using a management system that drives continual improvement.

## 6. ENVIRONMENTAL MANAGEMENT SYSTEM

Northparkes has developed and implemented a Health, Safety and Environment Management System (HSEMS). The environmental related system components are compliant with ISO 14001. This strategy acts as a framework document to provide an overview of the environmental components of the HSEMS.

The components of the HSEMS that are consistent with the principles of ISO 14001 are detailed in Appendix B. ISO 14001 guidelines include the following components as requirements of a certified environmental management system;

- Leadership;
- Planning;
- Support
- Operation;
- Performance Evaluation; and
- Improvement.

Doc No. PLN-0062	Version No. 16.02	Next Review Date 14/03/2025	Owner Environment & Farms Superintendent
---------------------	----------------------	--------------------------------	--

## 6.1 Leadership

### 6.1.1 Environmental Policy

Northparkes is committed to meeting the requirements of the Environment, Safety, Health and Community Policy (Appendix C). This policy leads the HSEMS and defines the overall direction for HSE management at Northparkes.

All activities are conducted in accordance with the HSE Policy and are aligned with the Northparkes Environment Standards.

All inducted personnel are made aware of their responsibilities in relation to the policy and it is made readily accessible through the Northparkes intranet.

### 6.1.2 Structure and Responsibility

The Managing Director is accountable overall for Northparkes' environmental performance and will implement the systems that have been developed to manage environmental aspects and impacts. The Managing Director will make provision for adequate resources to be available to implement the Environmental Management Strategy at Northparkes Mines.

The People, Safety and Environment Manager (PSE) is responsible for overseeing the environmental performance of the operation and compliance with the conditions specified in DC11\_0060, environmental licences and associated management plans. The PSE Manager is responsible for reporting on the performance of the HSEMS to Senior Leadership Team and is contactable during normal working hours on (02) 6861 3000.

All employees and contractors working for and on behalf of Northparkes are responsible for environmental risk and impact management in their roles. All environmental incidents will be reported to the PSE Manager or delegate. All employees are provided with environmental awareness training through a site induction process and monthly HSE presentations.

The Northparkes management team and HSE department structures are shown in Appendix E.

## 6.2 Planning

### 6.2.1 Environmental Aspects and Impacts

The on-going identification of environmental aspects and impacts is a key component of the HSEMS and in driving the continual improvement process. The review process is a tool which can be used to ensure the previously identified management practices are in place and are effective or if additional measures can be implemented to further reduce environmental risk.

The site aspects and impacts register is reviewed on at least an annual basis. This process is scheduled by the Environment and Farm Teams with those responsible for each aspect area. The aspects and impacts register is maintained in the site Document Control System (DCS). The aspects and impacts register will be reviewed in the event of a major change to the project or in response to a significant environmental incident or hazard investigation.

### Legal and Other Requirements

Northparkes commits to complying with all relevant legal and other requirements. This includes all relevant legislation, licences, Company, Australian and International Standards and other requirements.

DOCID-3-4747 Northparkes Licence and Permit Register contains a list of the HSE permits and licences and includes a link to the location of these documents.

A register(s) of the legal and other requirements is maintained within the HSEMS. The HSE Legal Register within the incident reporting and management system, details how these requirements apply to the operation's environmental aspects. PRO-0119 Maintaining Legal Compliance Register provides information on how the register is maintained.

Doc No. PLN-0062	Version No. 16.02	Next Review Date 14/03/2025	Owner Environment & Farms Superintendent
---------------------	----------------------	--------------------------------	--

A summary of approvals and licences is provided in Appendix D, including the government agencies and the applicable legislation.

Assessment of compliance is an ongoing process through analysis of environmental monitoring data, site inspections, periodic audits and external reporting requirements.

Any non-compliance against Northparkes operating licence conditions will require an Incident report to be raised within the internal reporting system, appropriate government authority notifications will be conducted in the event that this occurs. This will be conducted in accordance with PRO-0148 Incident Management.

### **Objectives, Targets and Improvement Plans**

With the aim of continual improvement in HSE performance, annual objectives and targets are developed. Environmental objectives and targets are aligned with the requirements of the environmental policy and are set in consideration of the following:

- Legislation and standards;
- Stakeholder expectations;
- Technological options;
- Significant HSE aspects; and
- Operational impacts.

This process is also linked to the business planning process and facilitates budgeting for environmental improvement projects.

The process of developing, implementing and monitoring HSE objectives and targets is defined in the site HSE Management System.

Departmental improvement plans have been established that detail actions against their highest environmental risks as identified within the site risk register. The plans form the basis for budget justifications and resourcing of the high-risk impacts. The documentation of these plans outlines not only the required outcomes, but also the department responsibilities and the means and timeframe by which they are to be achieved.

## **6.3 Support**

### **6.3.1 Training, Awareness and Competence**

All personnel working for or on behalf of Northparkes Mines shall be aware of their environmental responsibilities in relation to the HSE Policy and HSEMS requirements, consequences of deviating from the policy and procedures, role in emergency response, and the potential and actual environmental impacts of their tasks and roles. Awareness programs may include inductions, training sessions and various multimedia communication of environmental information across sites.

All personnel working for or on behalf of Northparkes Mines shall be competent in managing their significant environmental risks by virtue of qualifications, experience or training.

Northparkes identifies competency requirements based on environmental risks associated with roles and functions of employees within the organisation. To address training requirements, training programs are implemented and records are maintained for verification purposes.

PLN-0080 Training Management Plan details the processes in place at Northparkes for the management and maintenance of HSE training.

### **6.3.2 Communication**

Effective communication between all key stakeholders is important for the successful implementation and operation of the HSEMS. Specific communication mechanisms include;

- Internal communications;

Doc No. PLN-0062	Version No. 16.02	Next Review Date 14/03/2025	Owner Environment & Farms Superintendent
---------------------	----------------------	--------------------------------	--

- External communications;
- Complaints management; and
- Dispute resolution.

PLN-0040 Stakeholder Communications Management Plan provides information on the communication process at Northparkes.

### **Internal Communication**

HSE requirements and responsibilities are communicated through internal meetings, regular reporting and training programs. Responsibilities are also defined in employees Role Description. These may include HSE responsibilities.

Northparkes communicates relevant procedures and requirements to suppliers, customers and contractors via contractual agreements, regular meetings and training programs. Meeting types and their frequency are listed in PLN-0040 Stakeholder Communications Management Plan.

### **External Communication**

Northparkes maintains an external communication and complaints system which addresses and records communication from external stakeholders. All external communications are undertaken in accordance with this system. The process for this is outlined in PLN-0040 Stakeholder Communications Management Plan.

A Community Consultative Committee (CCC) has been established to provide a forum for open discussions and feedback between representatives from Northparkes and residents of the local community. Northparkes also consults with its immediate neighbours on a six monthly basis.

The Northparkes website is a key mechanism for external dissemination of information, it provides stakeholders with readily accessible up-to-date information on Northparkes and its performance. The website is located at [www.northparkes.com.au](http://www.northparkes.com.au). Copies of DPE approved environmental management plans and programs, quarterly monitoring results summary and the Annual Review as required under Development Consent 11\_0060 will be made available.

Northparkes has a Facebook and Instagram account which provides general information regarding the operation and its employees and contractors.

Northparkes maintains a 24-hour telephone line (02 6861 3000 – Option 3) to allow a quick and effective response to community concerns in relation to environmental matters.

Complaint records are kept for at least four years after the complaint was made and will be available to any authorised officer of the Environment Protection Authority (EPA) who may require details. Complaint records are also provided in the relevant Annual Review. External communications are also held as required with relevant government agencies.

### **Complaints Management**

Any complaints that are received relating to Northparkes operations are recorded and actioned in accordance with the Stakeholder Communications Management Plan (PLN-0040). Notifications of complaints received are provided to the Communications and Engagement Specialist as soon as possible to ensure a timely response. All complaints are recorded and outcomes of any investigation findings and corrective actions implemented are reported in the Annual Review.

### **Dispute Resolution**

Northparkes consults regularly with stakeholders to avoid disputes arising through the communication mechanisms outlined above.

In the event that a dispute arises between Northparkes and a government authority regarding compliance with development consent conditions the matter shall be referred to the Secretary of the DPE for resolution. If not resolved by the Secretary, it will then be referred to the Minister for Planning.

Doc No. PLN-0062	Version No. 16.02	Next Review Date 14/03/2025	Owner Environment & Farms Superintendent
---------------------	----------------------	--------------------------------	--

In addition, for any dispute that occurs between Northparkes and a member of the community that cannot be resolved through direct consultation, the matter will be referred to the relevant government authority for resolution.

### **6.3.3 Documentation, Document Control and Record Management**

HSEMS documentation and records are prepared and maintained in an orderly manner sufficient to implement the system in accordance with the ISO 14001:2015 Standard.

Northparkes have established procedures for controlling documents to ensure:

- Periodic review and approval by relevant personnel;
- Current versions of documents are easily located and available in identified locations;
- Obsolete documents are promptly removed from points of issue and use and archived appropriately; and
- Documentation is legible, dated (with dates of revision) and readily identifiable.

The document control processes is defined in PRO-0116 Document Control Procedure.

#### **Document Control**

Northparkes will ensure that environmental documentation is maintained, up to date and readily available to all authorised personnel. The following procedures ensure document control:

- Copies of the environmental management documentation will be kept on-site with Northparkes' electronic Controlled Documents, once printed the document will be considered "uncontrolled";
- The document will be reviewed, and if necessary revised, when major changes occur to ensure that it remains accurate and in accordance with all relevant standards;
- All Northparkes personnel and contractors will be notified of relevant revision to the environmental management documentation; and
- The environmental management documentation will be clearly dated.

### **6.4 Operational Control**

Operational controls are required to be implemented where activities are identified as potentially having environmental impacts and to ensure environmental objectives and targets are met. The process of the development, implementation and maintenance of operational control is documented in the HSE Management System.

Environmental operating procedures, management plans and programs are established, documented and maintained for operational activities to minimise risks and reduce the potential environmental impact(s) identified.

Northparkes has developed standard environmental operating practices to reduce, minimise or eliminate potential environmental impacts across the operation. These procedures, management plans and programs include but are not limited to;

Doc No. PLN-0062	Version No. 16.02	Next Review Date 14/03/2025	Owner Environment & Farms Superintendent
---------------------	----------------------	--------------------------------	--

- PLN-0063 Air Quality Management Plan;
- PLN-0052 Blast Management Plan
- PLN-0058 Surface Water Management Plan;
- PLN-0056 Water Management Plan;
- PLN-0070 Noise Management Plan;
- PLN-0048 Mineral Waste and Acid Rock Drainage Management Plan;
- PLN-0065 Biodiversity and Offset Management Plan; and,
- PLN-0092 Traffic Management Plan.

Operating procedures are reviewed on a regular basis, and revised as appropriate, to ensure all significant aspects of the operation are appropriately controlled. New procedures will be developed on an as needs basis.

All personnel working for or on behalf of Northparkes shall be aware of the relevant operating procedures when undertaking their day to day duties. Responsibility will be delegated to the most effective level of supervision to ensure compliance.

#### **6.4.1 Pollution Incident Response Management Plan**

Northparkes PLN-0046 Pollution Incident Response Management Plan (PIRMP) is to be immediately implemented in the event that a pollution incident occurs at the Northparkes Mines such that material harm to the environment is caused or threatened.

##### **Pollution Incident Definition**

A 'pollution incident' includes a leak, spill or escape of a substance, or circumstances in which this is likely to occur.

According to the POEO Act definition:

*pollution incident - means an incident or set of circumstances during or as a consequence of which there is or is likely to be a leak, spill or other escape or deposit of a substance, as a result of which pollution has occurred, is occurring or is likely to occur. It includes an incident or set of circumstances in which a substance has been placed or disposed of on premises, but it does not include an incident or set of circumstances involving only the emission of any noise.*

Pollution incidents causing or threatening material harm to the environment trigger the incident response measures below (including notification) and detailed in the Pollution Incident Response Management Plan.

Harm to the environment is material if:

1. it involves actual or potential harm to the health or safety of human beings or to ecosystems that is not trivial, or
2. it results in actual or potential loss or property damage of an amount, or amounts in aggregate, exceeding \$10,000. Loss includes the reasonable costs and expenses that would be incurred in taking all reasonable and practicable measures to prevent, mitigate or make good harm to the environment.

'Material harm' includes on-site harm, as well as harm to the environment beyond the premises where the pollution incident occurred.

Examples of environmental pollution incidents threatening material harm to the environment include:

Doc No. PLN-0062	Version No. 16.02	Next Review Date 14/03/2025	Owner Environment & Farms Superintendent
---------------------	----------------------	--------------------------------	--

- hydrocarbons, tailings, untreated mine water, chemical substances, or hazardous materials which have, or threaten to enter either clean water systems on site or possibly be released from site; or bush fires within surrounding areas, including on company owned land.

Examples of environmental incidents which may not threaten material harm to the environment include:

- spills which are contained within the Northparkes dirty water system, minor hydrocarbon or other substance spill to land, sediment basin discharge where greater than design rainfall has been received and no other material pollutants are in the surface runoff.

In order to be prepared for a pollution incident or an environmental emergency on site, notification and response procedures have been developed.

### **Incidents Causing or Threatening Harm to Environment**

Part 5.7 of the Protection of the Environment Operations Act 1997 (POEO Act) specifies requirements relating to the notification of pollution incidents.

Under Part 5.7, the occupier of premises, the employer or any person carrying on the activity which causes a pollution incident must immediately notify each relevant authority when material harm to the environment is caused or threatened.

Incident notification processes are defined in PRO-0148 Incident Management.

### **Internal Notification Protocol**

All employees and contractors are legally required to assist Northparkes to meet EPA's notification requirement. Under the internal notification protocol, it is intended that the Northparkes People, Safety & Environment Manager (PSE Manager) or Managing Director undertake external notification. The internal notification protocol allows external notification by other parties in the case that the PSE Manager or Managing Director cannot be immediately contacted.

A person witnessing a potential material harm pollution incident must:

1. Immediately notify your Northparkes supervisor or Environment Phone (0418 206 471) or the Northparkes Access Control (02) 6861 3211 per the Northparkes Emergency Procedures. The supervisor or Environment Team member should then immediately:
  - o Notify the People, Safety & Environment Manager (PSE Manager); or
  - o Notify the Managing Manager (in the absence of the PSE Manager).
  - o Enter the incident details into the site incident management system.

**Note:** This can be any time 24hrs per day.

2. In the event that the supervisor or the Control Room Operator cannot be immediately contacted, contact the E&F Superintendent immediately.
3. In the event the E&F Superintendent or PSE Manager cannot be immediately contacted, the EPA require that the supervisor/employee/contractor/agent must notify the EPA immediately.

**Note:** In this instance, the PSE Manager and/ or the Managing Director should be contacted as soon as possible after notifying the EPA.

Doc No. PLN-0062	Version No. 16.02	Next Review Date 14/03/2025	Owner Environment & Farms Superintendent
---------------------	----------------------	--------------------------------	--

### **External Notification Protocol**

After the internal notification protocol has been followed, the person responsible for external notification must immediately follow the notification protocol specified in the site Pollution Incident Response Management Plan.

### **Relevant Information**

The relevant information about a pollution incident required under section 148 of the POEO Act consists of the following:

- the time, date, nature, duration and location of the incident,
- the location of the place where pollution is occurring or is likely to occur,
- the nature, the estimated quantity or volume and the concentration of any pollutants involved, if known,
- the circumstances in which the incident occurred (including the cause of the incident, if known),
- the action taken or proposed to be taken to deal with the incident and any resulting pollution or threatened pollution, if known.

### **Notification to Landowners/Tenants**

In the event there is an incident which poses a potential threat to surrounding property owners and occupiers, Northparkes will notify those likely to be affected as soon as practicable. Depending on the nature of the incident, this may be in conjunction with or undertaken by Community Department as per PLN-0040 Stakeholder Communications Management Plan.

The effected landowners will be notified in writing of any exceedance of environment monitoring criteria for dust, noise and water as required by the Development Consent, within one week of obtaining results from the lab. In the instance of air quality criteria, Northparkes will also send a copy of the NSW Health fact sheet entitled "Mine Dust and You" to the affected landowners and/or existing tenants of the land including the tenants on mine-owned land.

Northparkes will also notify all privately-owned land owners within 2 kilometres of the approved open cut mining pits that they are entitled to request an inspection to establish baseline condition assessments of any building or structures on their land. This will be undertaken 3 months before the commencement of open cut mining operations.

Northparkes will also inform landowners of their rights under DC11\_0060 before entering into any agreement on exceedances of dust and/or noise criteria. Northparkes will also provide information of the potential health and amenity impacts associated with living on the land.

### **Notification to Government Agencies**

Northparkes must provide written details regarding the incident to relevant government departments including DP&E, DRE and the EPA within 7 days of the date on which the incident occurred. The PSE Manager needs to sign-off on the written report in accordance with DC11\_0060 and EPL 4784.

### **Incidents not causing or threatening material harm to environment**

Environmental incidents which are identified as not causing or threatening material harm to the environment should be contained if safe to do so, then the Northparkes Mine Incident Reporting procedure undertaken.

## **6.5 Performance Evaluation**

Regular environmental inspections of operations are conducted. These inspections determine, in conjunction with the environmental monitoring and incident reporting procedures, onsite compliance with the HSEMS. The inspections are conducted in accordance with PRO-0113 Zero Harm Operations Walk Procedure.

Doc No. PLN-0062	Version No. 16.02	Next Review Date 14/03/2025	Owner Environment & Farms Superintendent
---------------------	----------------------	--------------------------------	--

Northparkes' internal auditing program is designed to assess whether the HSEMS is effectively implemented and maintained and conforms to legal and other requirements. An annual schedule specifies the audit team, frequency and scope of internal audits. Audit reports are presented at the Management Review meeting, which is signed off. Internal audits are conducted as per PRO-0114.

All corrective actions for non-conformance findings from audits and inspections are actioned through the internal system. This is conducted in accordance with PRO-0115.

### **Monitoring & Measurement**

Activities that have the potential to result in significant impacts (such as the release of contaminants) are identified in the development, review and maintenance of the Environmental Aspects and Impacts Register DOCID-18-7751. Procedures for monitoring and measuring performance, operational controls and conformance with environmental objectives and targets are documented.

The environmental monitoring program, coordinated by the Environment Team, is undertaken by appropriately trained personnel. The Environmental Measuring and Monitoring Program Procedure (PRO-0150) consolidates the requirements for all environmental monitoring conducted onsite. REG-008 Environmental Monitoring and Measuring Schedule includes the list of environmental monitoring locations, frequencies, reporting and monitoring types.

A number of monitoring programs have been established to allow for the measurement and management of key potential cumulative impacts as follows:

- Air Quality;
- Noise;
- Surface Blasting;
- Surface Water;
- Groundwater; and
- Biodiversity and Rehabilitation

Monitoring procedures and equipment calibration techniques adopted comply with recognised Australian Standards and external criteria where applicable. External services employed for laboratory analysis of critical data are NATA accredited where applicable.

Monitoring data will be regularly assessed to ensure that any trends indicating potential environmental impact are identified. In accordance with Condition 11, Schedule 6 of DC11\_0060 a summary of monitoring results will be made publicly available at the mine and on the website ([www.northparkes.com](http://www.northparkes.com)) and updated on a quarterly basis.

An Annual Review that details the environmental performance of the previous year is prepared and submitted to all relevant stakeholders as per PRO-0114 Auditing and Reporting Program.

## **6.6 Improvement**

### **6.6.1 Implementing corrective actions**

Corrective and preventative actions will be implemented through the development of an action plan. The plan will provide details on the action required, time frame and responsibilities for completing the action. The implementation of the corrective and preventative actions will be reviewed internally and specific procedures developed for addressing non-conformances with the EMS or subordinate plans and strategies. This is conducted as per PRO-0115 Action Management.

### **6.6.2 Review and Continuous Improvement**

Operational activities will be subject to regular review to ensure conformance with commitments made in the EMS and subordinate plans and strategies.

Doc No. PLN-0062	Version No. 16.02	Next Review Date 14/03/2025	Owner Environment & Farms Superintendent
---------------------	----------------------	--------------------------------	--

In accordance with Schedule 6, Condition 5 of DC11\_0060, the Environmental Management Strategy will be reviewed, and if necessary revised, within 3 months of the submission of an:

- a) Annual review under Condition 4 of Schedule 6;
- b) Incident report under Condition 7 of Schedule 6; and
- c) Audit report under Condition 9 of Schedule 6.

New activities or changes to the operation that may result in environmental issues will be assessed to determine if changes are required to manage the impacts, and so if any revision to a particular subordinate plan is required.

The review process will include formalised procedures including independent audits, or consultation with relevant specialists where required.

An Independent Environmental Audit was commissioned by 31 March 2015, and every three years thereafter (unless the Secretary directs otherwise) in accordance with Schedule 6, Condition 9 of DC11\_0060. This audit will be conducted by suitably qualified, experienced and independent expert/s whose appointment has been endorsed by the Secretary.

Any revisions of the EMS will be undertaken to the Satisfaction of the Secretary of NSW, Department of Planning and Infrastructure in the event that major changes are made to the manner in which environmental aspects and impacts are managed. In the event of format changes or updates to referenced HSE system documents a copy will be provided to the Department of Planning and Infrastructure, however approval would not be required.

Doc No. PLN-0062	Version No. 16.02	Next Review Date 14/03/2025	Owner Environment & Farms Superintendent
---------------------	----------------------	--------------------------------	--

### 6.6.3 Management Review

The Northparkes Management team is responsible for ongoing review of the effectiveness of the HSEMS and continuous improvement of the HSEMS.

The review addresses the possible need for changes to policy, objectives, and other elements of the HSEMS, in light of system audit results, changing circumstances and the commitment to continual improvement. These reviews will be conducted in accordance with PRO-0112 Management Review of HSE Management System.

The management review ensures that the necessary information is collected to allow management to carry out the review and document findings in the meeting minutes.

### 6.6.4 Strategy Review

This Strategy will be reviewed and updated on an annual basis.

In addition, this Strategy will be reviewed within six months of an Independent Environmental Audit in accordance with Condition 5, Schedule 6 of DC11\_0060.

### 6.6.5 Checking and Corrective Actions

#### Non Compliance, Corrective & Preventative Action

Non-compliances may be identified by a range of mechanisms including:

- Review of monitoring results;
- Complaints;
- Site inspections;
- Audits; and
- Incident reports.

Incidents and near misses at Northparkes are reported internally through the internal system which is supported by a database to manage the system. This will be conducted in accordance with PRO-0148 Incident Management.

Incident investigations and corrective actions are conducted and authorised by designated personnel. The degree of involvement of the environmental function depends on the nature and scale of the incident.

At a minimum all environmental incidents obtain recommendations for corrective and preventative actions prior to close out of the incident. All corrective actions for nonconformance findings from audits and inspections are actioned through the internal system.

Any non-compliance against Northparkes operating licence conditions is reported internally and externally. Incident reporting will be in accordance with Condition 7, Schedule 6 of DC11\_0060 and in line with the Incident Management Procedure (PRO-0148).

Non-compliance incidents that are reportable to government departments are also reported to the company and Joint Venture partners as they may have the potential to impact upon the business.

The frequency and severity of incidents and non-conformances are used in the Management Review process for determining the effectiveness of the HSEMS.

Doc No. PLN-0062	Version No. 16.02	Next Review Date 14/03/2025	Owner Environment & Farms Superintendent
---------------------	----------------------	--------------------------------	--

## Adaptive Management

The PSE Manager (or delegate) will review all environmental monitoring results on a regular basis to ensure compliance with all statutory, legislative and approval requirements (DC11\_0060, other development consents, EPL, mining approvals), and to identify where results or trends indicate a risk of future non-compliance to the development consent criteria or other approval conditions.

Northparkes will assess and manage all project-related risks to ensure that there are no exceedances of the criteria as mentioned in Schedules 3 & 4 of the DC11\_0060. Should environmental monitoring show that the relevant criteria or threshold has been exceeded, the company will conduct an investigation into the potential sources and/or causes. The investigation will consider any plant operation or other factors that may have resulted in the exceedance. If the company is responsible for the exceedance further actions will be taken to address the matter. The relevant environmental management plan as required in DC11\_0060 will detail reporting requirements regarding monitoring results or environmental incidents.

A report on the exceedance will be provided to the DPE or other relevant agency (such as EPA). The report will:

- a) describe the date, time and nature of the exceedance/incident;
- b) identify the cause (or likely cause) of the exceedance/incident;
- c) describe what action has been taken to date; and
- d) describe the proposed measures to address the exceedance/incident.

If the results of environmental monitoring identify that impacts generated by the project are greater than the relevant impact assessment criteria, except where a negotiated agreement has been entered into in relation to that impact, then Northparkes shall, within one week of obtaining the monitoring results, notify the Secretary, the affected landowners and tenants (including tenants of mine owned properties) accordingly, and provide quarterly monitoring results to each of these parties until the results show that the project is complying with the criteria.

If the results of environmental monitoring identify that impacts generated by the project are greater than the relevant air quality impact assessment criteria, then Northparkes shall send the relevant landowners and tenants (including tenants of mine owned properties) a copy of the NSW Health fact sheet entitled "Mine Dust and You" (and associated updates) in conjunction with the notification required above.

## 7. REGULATORY REQUIREMENTS

Northparkes commits to complying with all relevant legal and other requirements. This includes all relevant legislation, licences, Company, Australian and International Standards and other requirements.

A summary of relevant approvals and licences is provided in Appendix D - Summary of Approvals and Licences. These include requirements of Mining Leases, and of the Environmental Protection Licence (EPL) that must be satisfied.

This Environmental Management Strategy (the Strategy) has been developed in accordance with Condition 1, Schedule 6 of the Department of Planning, Industry and Environment (DPE) DC11\_0060. Table 4 indicates where each component of the Condition is addressed within this document.

**Subject: Northparkes Extension Project (MP11\_0060) - Environmental Management Strategy**

Dear Mr. Higgins,

I refer to your request for review and approval of the Environmental Management Strategy for the Northparkes Extension Project (MP11\_0060). I also acknowledge your response to the Department's review comments and request for additional information.

The Department has carefully reviewed the document and is satisfied that it generally meets the requirements of the relevant conditions of approval.

Accordingly, as nominee of the Planning Secretary, I approve the Environmental Management Strategy (Revision 16.0, dated May 2023) under Schedule 6, Condition 1.

Please ensure you make the document publicly available on the project website at the earliest convenience.

The Department notes Northparkes is currently preparing a modification report for Mod 10. Please ensure when Environmental Management Strategy Rev 16.0 is next revised, that Table 2 on page 19 is reviewed and updated so the referenced sections are correct, also references to Mining Operations Plan (MOP) are to be amended throughout the document.

If you wish to discuss the matter further, please contact Scotney Moore, on 02 9274 6342.

Yours sincerely

Wayne Jones  
Team Leader - Post Approval  
Resource Assessments

As nominee of the Planning Secretary

### 8.3 Appendix C – Health, Safety and Environment Policy

**Northparkes Mines**  
A century of mining together

# Health, Safety and Environment Policy

*At Northparkes we care about our people and the communities in which we live. Our commitment to the health and safety of our people and the protection of the environment are essential to our long-term vision of 'A century of mining together'.*

**To achieve this and continuously improve performance, we will:**

- ✓ Demonstrate visible leadership at all levels and engage with our workforce to build a safe work culture.
- ✓ Ensure that our workforce is skilled in hazard identification and risk management and can apply these skills to protect themselves, their workmates and the environment.
- ✓ Provide the necessary resources needed to fulfill health, safety and environment commitments and objectives.
- ✓ Operate in accordance and compliance with all applicable laws, regulations, CMOC group policies, Northparkes site requirements and other commitments.

- ✓ Implement risk management processes to systematically identify, eliminate and prevent incidents that may lead to injury or pollution.
- ✓ Assess and manage the hazards of our operation and product in accordance with our Health, Safety and Environment System.
- ✓ Understand and respect the expectations of our communities, customers and other stakeholders to effectively manage our risks.

  
 Jianjun Tian,  
 Managing Director,
